

Boost your revenue with a secure modern workplace

Microsoft offers modern workplace solutions for secure collaborative teamwork. Anytime, anywhere it matters.

Digital transformation has dramatically changed the way we work. Teams want to spend less time at the office, work with their favourite devices, and execute tasks in their own time.

82% of employees feel more productive when working from home¹

61% now use their home broadband service to access work applications²

24% use a mobile data connection via their smartphone, tablet or laptop with a broadband dongle²

The question is, how do you keep your business safe with a workforce so disparate?

Security risks – at a glance

Many small businesses believe they're not a target when it comes to cybercrime. The truth is, because of their perceived level of security, they can be even bigger targets than larger companies. Some even hold more data without additional security in place to keep it safe – putting them in the spotlight for hackers and potential GDPR penalties.

By 2021 cybercrime damages will cost the world \$6 trillion, annually³.

43% of cyber attacks target SMBs⁴

35% of people have at least one unprotected device⁶

By 2019, one business will fall victim to a ransomware attack every **14 seconds³**

48% of data security breaches are caused by acts of malicious intent. Human error or system failure account for the rest⁵

Only **38%** employees think about data security when sharing work-related content with external parties while **11%** never even consider it⁷

By **2021** cybercrime damage costs will generate more profit than the combined global trade of all major illegal drugs³

In 2016, **689 million** people in 21 countries experienced cybercrime⁶

Collaborate and connect in confidence

Microsoft enables your teams to work flexibly while you get peace of mind, with trusted in-built device management and security solutions.

Regular software updates **protect against cyber attacks**

Baseline security configuration across managed devices, always-on

Simplified deployment and quick user set-up

Centralised control of company data on personal devices

Small upfront cost and a reduced risk profile

Benefits of a modern workplace

Today's most productive employees — business professionals who are contributing, creating, and affecting change — are a company's true competitive advantage.

72% of employees say their future success depends on their ability to be creative⁸

Microsoft Benefit: Achieve more together with apps built for creativity

58% think they would be more motivated working away from office⁹

Microsoft Benefit: Teams can be productive anywhere that matters, even when offline

92% are negatively impacted by the limits of their business' remote-access policies¹⁰

Microsoft Benefit: Always-on security ensures your mobile workforce is safeguarded at all time

Put your mind at ease, let us manage your IT

Running a professional services business that needs to be set up for growth and protected from cyber-crime?
